CLEANROOM SYSTEMS

**World  
class  
solutions**

A total service for your clean room

## Unique products and systems for cleanrooms and controlled environments

MRC Systems offers a range of unique wall and ceiling systems with equipment and accessories.

Our unique systems offer:

- Integral wall-wall, wall-floor and wall-ceiling radius corners
- Integral low level air duct
- High quality and tough surface finish
- Integral service panels
- Easy and fast to install
- Maintenance free
- Competitive prices and great value

Technical specifications are given in the MRC CD-ROM.

# The Company

## The Company

A British Company offering engineering support and unique products to clients worldwide.

MRC is widely represented around the world by partners and agent organisations with offices and factories in the United Kingdom and the United Arab Emirates.

# Facility Design

## Facility Design

- Architectural
- HVAC
- Process Engineering
- Electrical Services

MRC has the skill and expertise to provide design solutions from conceptual through to detailed engineering levels, combining state of the art technology and great value.

On International projects our designers endeavour to incorporate locally available skills and materials, to ensure best performance and to achieve maximum cost savings and operational benefits.

# Project Management

## Project Management

MRC project management teams, supported by the latest technology in design and communication works closely with our clients to achieve the project specifications and design efficiently within agreed timeframe and cost.

Repeat business is of huge importance to us. Therefore, Client satisfaction is considered an essential criteria by which project success is measured. This is achieved by caring, good communication and professionalism.

# Installation

## Installation

Our experienced installation supervisors work around the world with our own installers or local labour with equal success.

The sophistication of the MRC design solutions and products make it possible for our supervisors to complete the installation with semi-skilled local labour whom they train, instruct and control.

The approach has clear cost and operational benefits to our international clients.

# Validation

## Validation

- Validation Master Plan
- Design Qualification (DQ)
- Operational Qualification (OQ)
- Installation Qualification (IQ)
- Performance Qualification (PQ)

Our validation team will provide advice and consultancy support to our clients or work within the MRC project team to ensure compliance with all relevant regulatory requirements and project design specifications.
